My unfinished story of VPL

Valuation & Validation of my Prior Learning

By:

INTRODUCTION

People invest in many ways in themselves, often without knowing and being recognised by themselves and by others. VPL (Valuation of Prior Learning) offers the possibility to increase the advantages of these investments. Essential of VPL is to recognise that learning not only happens in formal education, but that also other learning environments and contexts are and that there are many different ways to learn.

Secondly VPL clears the way for measure development of the individual in all kinds of organisations. It is of crucial importance to understand that VPL only can lead to full development if the individual knows how and can show his / her competences, if organisations have a clear view over and real perspectives for their human capital of competences and if the system supports this competence market for all formal and informal groups in which the individual is participating. This article demonstrates that each individual and organisation should use the opportunities of VPL. People learn and develop their competences always, everywhere, so why not make use of it?

In this booklet, a general process model in 10 steps is proposed for the use of VPL by individuals, in spite of their characteristics or objectives. It is the intention to initiate a discussion and develop a consciousness at the level of the individual. It is crucial to understand that this model indicates a way to adapt the VPL-process to the goals and needs of the individual, in spite of the area (private life, voluntary work, paid work, education) where the competences have been developed or will be applied and irrespectively the way the learning and the recognition takes place (formal, non-formal and informal).

The VPL process in 5 phases and 10 steps

The Valuation of Prior Learning (VPL) is the name for a broad view on the implementation of life long learning. The target it is to change the social-economic system in a flexible system that adapts itself fast to the changing needs of competences at the job market. In the context of the present network society, VPL addresses this need by clarifying the real human potential of competences on the basis of the analysis and recognition of personal competences. VPL offers a strategy for personal development in which the context of the organisation and the government- / private services are of crucial importance to keep pace with the fast competence development in the knowledge society and the increasing speed of competence marketing within the network society.

In view of this context, VPL concentrates generally on the needs from:

***“I”*: me, the individual:**

I am able to take power of control of MY own competence development and career to become or stay employable, no matter if I am young or old, the context I'm in and the way I am learning.

***“WE”*: the communities / organisations I'm in**

Companies, non-profit, volunteers organizations, private life: OUR organisation will support ME in my learning project, individual or with others, and make it possible for ME to use this to follow MY personal mission and to reach MY goal, while contributing to the larger goal of the community I am working / learning in.

“THEY”: the system and her elements

EFQ, NVQ, VET, guidelines, tools and advice, and other services for individuals, labour organisations, local municipalities and welfare care: To support ME and US from within THEIR existing frameworks, so that I can keep on developing and OUR community can also further develop. This becomes ‘the us-level’ named, the level of collective services that available is or must be for all citizens.

EVC in 5 phases

An EVC-procedure consists in the general out five phases:

- I. Engagement and awareness of the value of your own competences,
- II. Recognition (formal and informal) of my competences, by looking back, reflections
- III. Valuation and validation of my competences, formal, informal and looking forward
- IV. (Advice concerning the) development of my competences,
- V. Structurally taking up my competence based development process, according to a personal or through the organisation steered plan.

Together these five phases form the VPL-process. The phases are again divided in 10 steps. Below the 10-step-model is presented in a scheme.

On the basis of this table, each individual, including you, can go through those 10 steps!

Aware-ness	Starting/targets	Preparation & PDP	Retro-spective	Choose standard	Valu-ation	Vali-dation	Pro-spective	Working on PDP	Empower-ment
Commitment		Recognition		Valuation			Development		empowerment

VPL is a continuous valuing process. It takes place at all levels, from very informal like being appreciated by your colleague or your client up to the most formal valuation like accreditation with a diploma according to the national standards.

VPL includes stimulating actual learning or knowledge development we call this the broad or **formative VPL-approach**. The broad approach is prospective and aims at development. This includes the narrow **summative VPL-approach**, focusing on an overview of competences, the recognition and validation, also called the retrospective approach of VPL.

Step 1 Commitment

What about:	Who am I? Do I want to invest in myself?
What to do:	I have to become aware of: <ul style="list-style-type: none"> - My bottle is half-full - My own responsibility - My support options
Why:	My potential offer better economical chances and social participation; It offers insight in real possibilities for self-development;
Relation with direct environment:	Does the organisation allow me to invest in myself? Is it a stimulating environment? How: <ul style="list-style-type: none"> - Use and necessity for 'our' organisation - Show chances and threats - Show realistic perspective
Which external services are at my disposal:	PR campaign about the use and necessity of LLL Activating policy at national, regional, sector and local level. Creation of VPL-infrastructure for summative and formative purposes VPL-team within our organisation Examples / role models

MY BOTTLE IS ALREADY HALF-FULL !

*Which competences do I already have?
And what is the value of these competences for ME?
And how did / do others value my competences?*

Step 3 Preparation personal profile

What about:	How do I show my half full bottle / what I have?
What to do:	Choice of format Portfolio
Why:	Personalising your VPL-approach
Relation with direct environment:	Organisation offers: <ul style="list-style-type: none"> - Format portfolio - List of competences - Function profiles - Overview costs + possibilities for financing
Which external services are at my disposal:	Advise Formats for proof Clusters of competences Examples

*You cannot escape from the necessity to order, to organise.
Yet the manner in which you order, organise, needs to be revised continuously.*

I have made fragments, which vary:

- *partly or as a whole*
- *either or not combined with other fragments*
- *either or not related to other elements*
- *different in space and time.*

External services: (THEY and WE)	

Step 7 Finalising validation

What about:	Formal recognition of competences Advise
What to do:	Accreditation Personal advise present and development potential
Why:	Now I can start with what I want to achieve and what is feasible
Relation with direct environment:	Organisation offers: <ul style="list-style-type: none">- Insight in quality and financing- Adjust personal goals- Store in portfolio database with development profiles
Which external services are at my disposal:	Share responsibilities Access to recognition or accreditation Advise formative approach Complaint handling

1	2	3	4	5	6	7	8	9	10
Aware- ness	Starting/ targets	Preparation & PDP	Retro- spective	Choose standard	Valu- ation	Vali- dation	Pro- spective	Working on PDP	Empower- ment
Commitment		Recognition		Valuation			Development		empower- ment

What about:	
What to do:	
Why:	
Internal input:	
External services: (THEY and WE)	

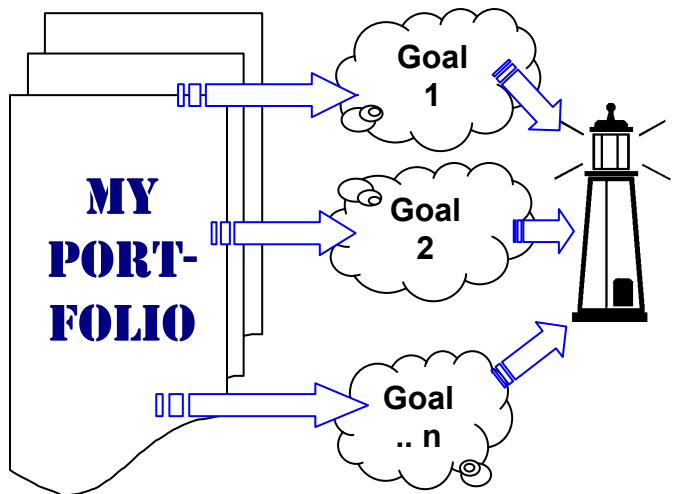

Step 8

Prospective: advise / POP

What about:	What to do now?
What to do:	Create my personal development plan
Why:	Now I can discuss with others (private, company, volunteers, school) how I can reach my goals.
Relation with direct environment:	Organisation offers <ul style="list-style-type: none">- Connection with Organisation Development Plan- Financing PDP
Which external services are at my disposal:	Advise Overview of opportunities Form of help made to measure Share of responsibilities

LOOKING FORWARD:

Commitment		Recognition		Valuation			Development		empower-ment

What about:	
What to do:	
Why:	
Internal input:	
External services: (THEY and WE)	

Step 9 Working on PDP

What about:	Executing PDP Evaluating PDP
What to do:	Measure work approach for ME Analysing after the first results about the usefulness Discussion with others about the effect of my PDP
Why:	Now I work with others who help me in achieving my goals I really want to now if I (will) benefit from the results of my efforts
Relation with direct environment:	Organisation offers: <ul style="list-style-type: none"> - Overview in development steps - Rights and duties - Support measure work - Model for analysing
Which external services are at my disposal:	Advise Access to measure work Quality assurance Analyse models Storing in national portfolio database

If you pursue filling emptiness with the pleasure of learning, the learning passes away and new emptiness remains.

If you pursue the existing fullness and richness and good with hard labour, the labour passes away, but the richness will become more full.

Step 10 structural implementation & empowerment

What about:	I doing it I am marinating it
What to do:	I choose for a form / content in which my PDP stays central in my career development. I choose in the range from 'active' to 'passive' PDP
Why:	Now I know the benefits and with my PDP in my hand, I will keep on working on my career
Relation with direct environment:	Organisation offers: <ul style="list-style-type: none"> - Overview of structural facilitating - Regularly update portfolio - Information about changes in PDP-support (for instance new labour agreements)
Which external services are at my disposal:	Supplying information Maintenance of PDP in national portfolio database

Empowerment is recognising that people already have power through their knowledge, experience, and motivation, and then creating an environment that encourages letting that power out.
